How to access my Github repository.

1. To directly access our Github repository on the browser, click on the link:

https://github.com/mustaphatidooyussif/parallel-distributed-computing

2. You can also clone the repository with your terminal or bash using the command

git clone https://github.com/mustaphatidooyussif/parallel-distributed-computing.git

3. The work for this assignment is in the folder, **LabExercise03**

Programs requirements
1. The program must be run with python 3.5 or later.
2. The programs require the correct command-line options passed in the terminal.

Example.
1. python3 mr_word_count.py < File2ForLab3.txt --stop-words=stop_words.txt
2. python3 mr_top_k.py   < File2ForLab3.txt   --stop-words=stop_words.txt
--top-k=4
